Re: Construction of a Bicycle Enclosure in the Underground Parking Garage at 35 Charles

I am happy to bring you good news about a building improvement at Student Family Housing. For the past 18 months, members of the Tenants' Association and Executive Members have participated in the design and development of a bicycle enclosure in the underground parking garage at 35 Charles.

The bicycle enclosure is currently under construction and should be completed by the middle of March 2017. The new bicycle enclosure will increase the bicycle parking capacity by approximately 90 spaces.

The enclosure will be located on the A Level of the garage, with resident key fob access. The bicycle spaces will not be reserved. A dedicated bicycle lane will be constructed on the entrance ramp for two-way bicycle traffic in and out of the garage. The enclosure will also house the bicycle 'fix-it' stand and will have a limited number of spots dedicated to baby bike trailers.

Stay tuned for additional information regarding the bicycle enclosure, changes to traffic flow and safety tips for bicycles and vehicles.

I would like to thank the members of the Tenants' Association who participated on this project.
